## Skills

### Languages
PHP, Python, Javascript, Typescript, SQL

### Styling
SCSS, CSS Modules, Styled-JSX

### Libraries
FP-TS, IO-TS, CKEditor, TinyMCE, VideoJS, Jest, jQuery, CropperJS

### Frameworks
NextJS, SvelteKit, Wordpress, Flask, CakePHP, Strapi, Statamic

### Servers
Apache, NGINX, Node, Express, EC2, S3

### Paradigmes
Object Oriented
Functional

### Print

## Work Experience

### BondLink
**Senior Frontend Engineer**

Boston, MA

Sep 2020 – Apr 2023

- Led the development of the BondLink corporate application, overseeing the integration of Plasmic with NextJS to delegate content creation and design tasks to the respective teams. Created documentation outlining best practices and conducted training sessions for the marketing, development, and design teams, ensuring the creation of a sustainable and easily manageable application.
- Built charts and features using DevExpress and FP-TS that satisfied series B investor requirements, displaying International Currency Exchange data related to institutional multi-year debt and payment information.
- Supported customer success' initiatives, planning and implementing client's features while maintaining clear communication with the back-end and design teams in order to ensure technical completeness and edge case fulfillment.
- Led internal and cross team meetings. Interviewed prospective candidates as the development team scaled from 4 to 12 employees. Mentored and supported 4 junior engineers.

### BetterLesson
**FullStack Software Engineer**

Cambridge, MA

Apr 2013 – Sep 2020

- As a full-stack developer on a small team of 3-5 individuals, I spearheaded hundreds of engineering projects encompassing 6 vital business applications. Leveraged technologies such as ReactJS, CakePHP, MySQL, Python, and Flask, these applications were utilized by over 250,000 educators.
- Ensured modern ReactJS practices by upgrading old dependencies and refactoring the codebase for the most modern ReactJS patterns.

Photoshop,
Illustrator, Indesign,
Gimp,  Inkscape,
Acrobat

## Education

**Center of Digital
Image Arts**

2009

Graphic and Web
Design Certificate

**Art Institute of
Boston**

2005

Illustration and
animation

- Introduced BEM naming to reign in on inconsistency and repetition in our SCSS codebase.
- Implemented and documented component conventions to ensure consistency in building our application in a scalable way while reducing prop drilling and increasing maintainability.
- Reviewed colleague pull requests ensuring code quality and requirement satisfaction.
- Implemented and documented application analytics used by the marketing and administration teams to inform decisions shaping application direction.

### BFSDaniels

Boston, MA

**Web Developer, Prepress Operator**

Sep  2011 – Mar 2013

- Collaborated closely with the CEO to develop the Pixxlz social printing platform, a web-based application for photo editing and printing. Utilized technologies such as jQuery, the Canvas element, and ImageMagick to build the application.
- Incorporated functionality to fetch images from multiple third-party APIs, including Facebook, Picasa, Instagram, and Shutterstock, with the goal of leveraging social media to drive increased print sales.
- Produced print materials for and maintained Wordpress sites for internal and client stakeholders.
- Supported the pre-press team by concerting client supplied files for print readiness ensuring final output fidelity.
